The FACE of
SPINE SURGERY

STEFANO M. SINICROPI, MD

Midwest Spine & Brain Institute

Dr. Sinicropi has treated more than 5,000 patients since 2006 at Midwest Spine & Brain Institute. His patients have experienced an exceptional rate of success using minimally invasive spinal procedures for disc replacements, spinal decompressions and spinal fusions. He currently serves as the President and CEO of Midwest Spine & Brain Institute. Dr. Sinicropi and his team believe that patient satisfaction is dependent on achieving an accurate diagnosis and tailoring a specific treatment plan for each patient's problem. The highly complex nature of the spinal column, spinal cord, and spinal nerves requires expert diagnosis in order to appropriately treat the underlying condition to help patients return to a normal life. Dr. Sinicropi and his team are dedicated to providing personalized and compassionate care to each patient. They will walk you through your treatment options and procedures, making sure you are informed every step of the way. SinicropiSpine.com
